

Thirona is a high-tech, fast growing company. Our focus is on development and marketing of automated analysis tools for medical images. Since our establishment in 2014, we have developed software products focusing on the analysis of thoracic CT scans (LungQ), chest X-rays (CAD4TB), and retinal images (RetCAD). Our products use state-of-the-art image processing techniques such as deep learning. Thirona has also developed a cloud solution as a service for its products based on AWS.

Thirona is ISO 13485 compliant. All our products have obtained CE certification and are actively used all over the world.
